

NEW SAFETURE FEATURE

# Scheduled Check-ins automates the process of making sure your employees are ok

## Mitigate risks and maintain peace of mind with a single add-on

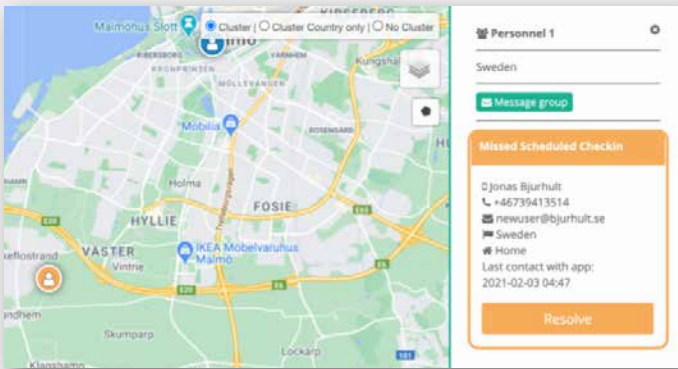

Are your employees working in insecure or high-risk areas?

With the Safeture scheduled check-in you have complete control of when your employees have to check-in from their Safeture mobile app.

Get notified immediately when a scheduled check-in is missed and take actions straight from your Safeture dashboard.

### Settings

- » The admin selects who and when to do the check-ins, the system will notify end-users of an upcoming check-in, and a missed check-in will trigger alerts to selected administrators
- » The end-user needs to activate the "Check in button".
- » When a check-in deadline is due by one or several users, the system will trigger notifications alarm the administrators of the situation. A separate widget will appear on the ISO Dashboard.
- » The module can be reached from the Security Overview part of the ISO management portal.
- » This functionality is an add-on to the standard ISO management platform.

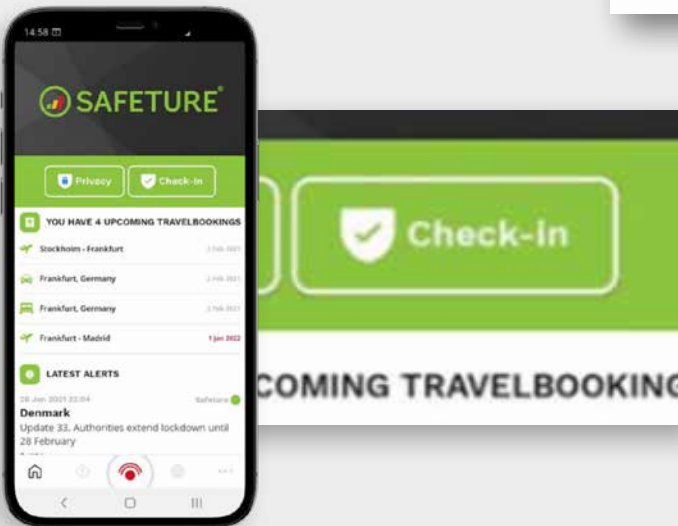

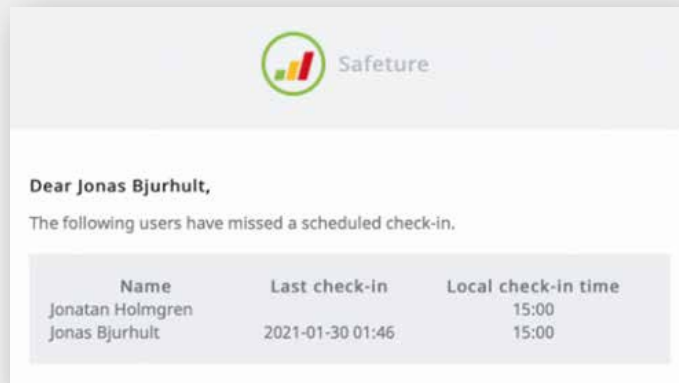

## Safeture Security Overview dashboard

The users with a missed Check-in will be highlighted on the Security Overview with an orange icon.

## Email notifications

A missed check in triggers an email notification sent to the admin.

## Safeture mobile app check-in button

The end-user needs to activate the "Check in button".

- » Appoint your employees
- » Automated communication
- » Reminder with security overview of the group in a potential danger
- » Be notified immediately and act
