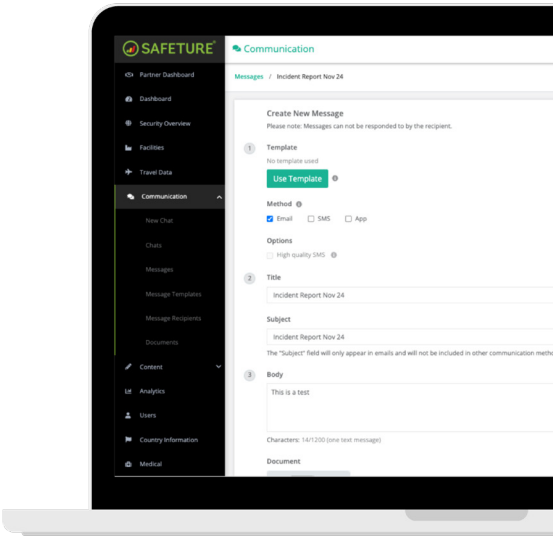
Product feature

Messages

'Messages' is a key feature of the communication module, offering platform administrators an effective way to distribute information. By introducing this new functionality, 'Messages' offers greater control over distribution and recipient management, providing a streamlined, intuitive user experience.

Bridging gaps for effortless communication



No-Reply Messaging System

'Messages' ensures one-way communication, ideal for announcements and updates without responses, keeping communication focused and simple.

Easy Recipient Management

Messages can be sent to any person within the Safeture platform to whom the administrator has access. Admins can invite or add external contacts and create and manage recipient lists easily from the Communication menu.

Quick Message Templates

Create, edit, and save reusable templates for fast, consistent communication. Templates are accessible through the Communication menu for easier management.

The new 'Messages' feature transforms admin interactions within the communication module through streamlined workflows. Recipient lists and message templates are accessible within the **Communication menu**, enhancing navigation and organization.
