

SAFETURE MOBILE APPLICATION

Safety in your hand. Connected to your organization.

Get relevant alerts of nearby incidents based on your location.

✔ Reliable communication

Higher deliverability rates with our smart and patented routing engine for SMS.

✔ Easy access to relevant information

Based on travel bookings and your location, you are only presented with relevant risk information.

✔ Check-in button

Manually report your location as a measure of ensuring your safety. Your manager or assistance provider can schedule the check-in requests so that you will get them at a certain day and time each week.

✔ Share your position

In case of emergency, get swift assistance.

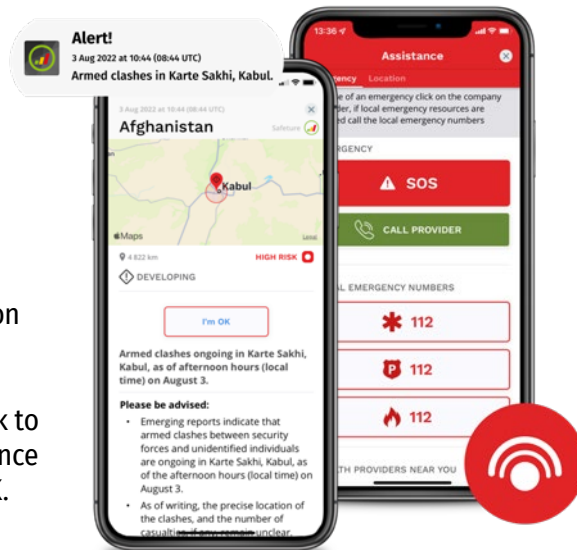

Safeture Mobile Application

Alerts:

Get notifications of incidents near you.

The Safeture Platform filters out alerts based on your location to present you with relevant risk information. Report back to your manager or assistance provider that you are OK.

Emergency Button:

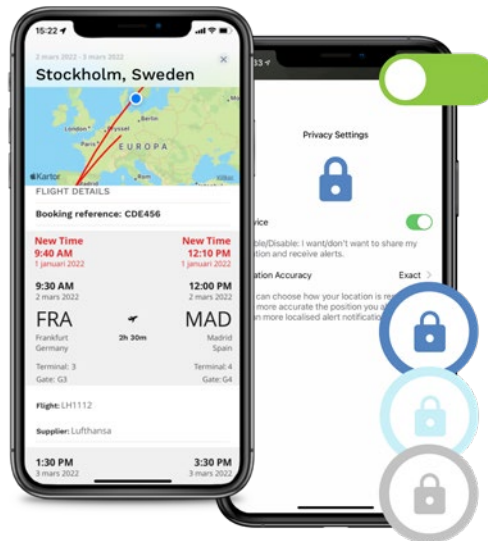

Help is just a click away.

Click the red SOS button to initiate emergency mode and notify both your organization and your assistance provider of your current location for prompt assistance.

Travel Bookings:

All the latest information on your upcoming travels.

Get an overview of all your upcoming travel bookings and notifications of any flight disruption or gate changes. Avoid risk through alerts and information on changed risk levels at your destination.

Privacy Settings:

Security and privacy should not be conflicting.

You can easily set your own privacy level in the app. Choose between exact location, city-level, or region/state level, or disable positioning capabilities altogether.

FAQ

Does the app consume much battery?

No. Although use and battery consumption can vary between individual devices, the app and the system have been optimized to keep good battery life, while at the same time offering good location positioning. Typically, the app only consumes a few percent of battery per day, when in background mode.

Where is the app available?

The app can be used on both iOS and Android devices and is available worldwide.

Does the app support single sign-on?

Safeture offers Single Sign-On which means that you use your existing company user log-in credentials to external platforms like Safeture. The username can even be pre-populated for an even smoother log-in process.
